Over the Counter (OTC) Drugs Guide

2012

AHM_Standard (HMO)

AHM_ELA Premier (HMO)

This guide includes a list of the most commonly used over-the-counter drugs (OTC) cover by American Health Medicare. This list does not represent the complete OTC list that we cover. The list is effective from January 1 to December 31, 2012. For more details please contact toll free our Customer Services Department at 1-888-620-1919 from 8:00 AM to 8:00 PM. TTY users should call 1-888-620-2520.

American Health Medicare has designed an OTC Drugs Guide to expand the pharmacy benefit for calendar year 2012. The guide is a quick reference to give you an idea of the OTC drugs that we cover. It only provides some examples of drugs covered by each category.

What are OTC drugs?

The OTC drugs (over the counter) are drugs approved by the U. S. Food and Drug Administration (FDA). These drugs are proven to be safe and effective in the treatment of different medical conditions such as: cough, cold, pain, diarrhea, and stomach pain among others.

What are the advantages of using OTC drugs?

The use of OTC drugs allows the member to have better access to a variety of medications available in the market to treat some medical conditions. Also, they allow the member to save money because they cost less than other drugs.

Are OTC drugs safe and effective?

Yes. OTC drugs have proven to be safe and effective. However, like any other medication using them inappropriately can have side effects. Remember always to read the label in the package for the specific instructions on dosage, warnings and precautions that you should consider when using them.

Who should I ask if I need an OTC drug?

Ask your doctor if an over the counter drug could be appropriate to you. Your doctor will help you select an over the counter drug that will help you treat your condition and symptoms. Remember, you need to ask your doctor for a prescription of the OTC drugs.

How does this benefit work?

During 2012, you will have \$50.00 for OTC drugs from January to June. From July to December you will have the same amount (\$50.00 for your OTC drugs). If you use the \$50 on the semester before the month of July, you will have to pay 100% of your OTC drugs. Any balance from the first six months cannot be transferred to the next 6-month period (no rollover). OTC drugs can be obtained in pharmacies participating in our network. **American Health Medicare required a prescription to obtain your medication.**

Once you have the prescription, visit one of our network pharmacies and go to the counter with your prescription and plan ID card. Your pharmacist will process your prescription as if it was any other prescription (electronically through the pharmacy payment system).

How to use this OTC Drugs Guide

This guide classifies OTC drugs by category of conditions. For example, drugs to treat cough and congestion are classified under the category *Cough / Cold / Allergy*. If you know for what

condition your drugs is used, look for your category name in the table that starts on Page 4. Then look for your drugs under the category. You can also look for your drug in the alphabetic index that starts on page 29.

The following categories are not eligible for the OTC benefit for 2012:

- Mouthwashes, teeth whiteners and bad breath items
- Alternative medicines
- Baby products (baby drugs, hydration drinks, within others)
- Lotions for dry skin (Eucerin, aquaphor)
- Contraceptivas
- Make up, medicated soap, hand sanitizer, therapeutic shampoo and dandruff shampoo.
- Nutritional Supplements such as Ensure, Boost, Lucerne, protein bars, energy drinks, salt and/or sugar supplements, within others
- Dairy products (Lactaid)
- Some products to quit smoking
- Diabetic supplies covered by Medicare Part B or Part D
- Products for hair loss
- Convenience items as scales, fans, magnifying glass, ear plugs, foot insoles and gloves.
- Replacement items such as heating aid batteries, contact lens' containers, etc.
